1005-ST — LASHER STREET IMPROVEMENTS

Division(s) Stormwater	☐ Facilities ☐ Sewer ☒ Streets ☐ Stormwater ☐ Water ☐ Parks ☐ Other: _____	**Point of Contact**
Category	☐ Maintenance _90_ % ☐ New/Extension _10_ %	Cody Rosander

About the Project

This project serves an underserved community for the first time since it was constructed in 1978. Cascade Village is a 36-unit apartment community lacking basic amenities such as sidewalks, well maintained streets and appropriate fire hydrant coverage.

Lasher Street connects this community to parks, services, and institutions located in downtown Stevenson and around downtown Stevenson. It is a narrow, dangerous, downhill route.

This project will transform Lasher Street from a dangerous soul-crushing corridor into a Complete Street prioritizing pedestrians and safety by adding sidewalks, pedestrian lighting, landscaping. The project will make the residents of the community safer by calming traffic and closing a fire hydrant gap.

Anticipated Schedule

Activity	Season/Year
■ Identification	2023/2024
■ Scoping	2022
■ Funding	2024
☒ Design	2024/2025
☐ Construction	2025
☐ Closeout	2025

Key: ☐ Not Started   ☒ In-Progress   ■ Completed

Budget Information

Date of Last Estimate:	6/30/2025
Basis of Estimate	Scoping
Design/Engineering	$ 400,000
Construction	$ 1,750,000
TOTAL PROJECT COST	$ 2,150,000

Dependencies

Potential Funding Source

Funding secured through WSDOT and TIB, funding application in with CDBG
